8th February 2010

Brandon,

I would like to thank the An Meá team for its excellent work on providing the necessary HSE expertise to satisfy the HSE requirements of our client, FosterWheeler WorleyParsons (FWW) on the Pluto LNG Project. We have enjoyed working with you, Steve, and William, and we feel that the results so far have been a success.

The work products that the team at An Meá delivered met our brief very well. All FWW pre-mobilisation requirements were met ahead of schedule. As such, we are able to mobilise personnel and equipment to the project site without delay.

The quality of your work has been highly commended by our client. We are confident that this will help us win more work with Pluto in the future.

Some of the work products you delivered that we feel are noteworthy include:

- HSE training and induction
- HAZID workshop
- Facilitation of weekly meetings between Airpac Bukom and FWW
- Contract HSE Plans and other key HSE management documents
- Safe Work Method Statements and Policies

Being a small company, we understand the significant impact a single incident can have on our HSE performance statistics. As we do not have in-house HSE expertise, we are very grateful for the timely and quality assistance An Meá provided us to meet FWW expectations on various HSE issues.

We look forward to continuing our productive collaboration.

Thanks again,

Chris Wootton
Director Asia Pacific
