Safety Awareness Program for FPSO Griffin Venture

Dear Graham,

I would like to express my personal thanks for the introduction and very successful facilitators' training package you presented to Griffin Operations on the Haz & Zard Safety Awareness Program.

Your workshop for the facilitators to introduce the program to the workforce, was well in excess of our expectations. I am very appreciative of the experience and expertise that you brought to the workshop.

Some comments, which have been communicated, back to me:

- Fresh and Positive approach to Safety Awareness
- Group Safety ownership (by the one's at risk)
- From the workforce for the workforce
- Easy to understand and effective awareness tool
- Allows active participation

I look forward to the complete implementation of the package within the Griffin Operations workforce; it has added an additional tool to assessing hazards and identifying mitigations in a proactive manner.

I wish you well in future endeavours with Haz & Zard Safety Awareness Program.

Yours sincerely,

Gary Mitchell
Facility Management HSEC Advisor
