

BRANDON LEE

Consultant

Brandon Lee is an environmental engineer at An Meá. He has 3.5 years experience in the environmental engineering field and in the Health, Safety and Environmental (HSE) work.

Brandon's professional career to date has encompassed projects for industrial and government clients as well as community groups in the USA, Australia and Russia.

In Australia, Brandon provided HSE support to Shell Development Australia in various areas such as performance monitoring and regulatory compliance reporting, emergency response and environmental planning.

Brandon assisted WorleyParsons in the development of training materials and interactive learning modules for their HSE data management system. He has also conducted an incident management review for all WorleyParsons operations in Australia including joint ventures and project alliances.

Since 2005, Brandon has spent 2.5 years working on the Air Emissions Inventory for the NSW Department of Environment and Conservation (DEC). This project covered the Off-Road Mobile module and the Domestic-Commercial module of the Air Emissions Inventory for the Greater Metropolitan Region of New South Wales.

In Russia, Brandon was part of the project team tasked with the implementation of the Health, Safety, Environment and Social Action Plan (HSESAP) for Sakhalin Energy, where HSESAP compliance must be obtained to receive partial funding for the construction of its Phase 2 assets. In addition, Brandon assisted Sakhalin Energy in the Emergency Response Competency Assurance for each position of the emergency response team.

Brandon holds a Masters Degree in Environmental Engineering Science and a Bachelor Degree in Aerospace Engineering. He is a Graduate Member of the Institute of Engineers Australia.
