

YAO TSENG

Consultant

Yao Tseng is an environmental engineer with over 10 years of international experience in Health Safety and Environmental (HSE) management. Yao has been involved in projects in Australia, South East Asia, Russia, the United States, and the Middle East.

Yao's career has included work on projects commissioned by community groups, industrial, and government clients. These projects involved industrial pollution control, air pollution inventories, wastewater treatment systems, environmental assessments, health risk assessments, engineering design, and performance evaluation of plants.

Yao managed a major air quality study for the New South Wales Environment Protection Authority (now Department of Environment and Climate Change) from 2003 to 2007. The project produced an inventory of air emissions from various domestic, commercial, and industrial sources. The study area covered the greater metropolitan region of New South Wales, and the results assisted the government to in its policy and decision making.

In addition to technical projects, Yao has extensive experience working on the development and implementation of health, safety, and environment management systems (HSEMS) for clients in the oil and gas industry. He has also provided services in areas such as audit, site assessment, competency assurance, HSE contractor management, and risk management for clients such as Petroleum Development Oman (PDO) and Sakhalin Energy Investment Company (SEIC).

Yao has contributed to the development of environmental training courses for several industry clients. These courses included general HSE induction, risk management, technical risk assessment, and environmental awareness.

Yao holds a bachelors degree in Environmental Engineering and is qualified as a provisional auditor of Environmental Management Systems. He is also a Member of the Institution of Engineers Australia.
